Full Stack Final Project

Front-end:

Code Your Website using the [following (CLICK HERE TO SEE THE DESIGN)](#) Figma UI design, the required pages are:

- Home Page (any 2 or 3 sections from the design)
- About Us
- Our Menu
- Book A Table
- Login
- Register
- Profile Page
- Admin Panel

Back-end:

After implementing your database schema, you need to do the following functions:

- Login & Register (there are two types of users, normal users, and admins)
- Our Menu (admin can add, delete, update items in the menu from the admin panel)
- Book a table:
    - Only logged in users can book a table.
    - The admin receives the booking requests in the admin panel, confirm the booking, when the admin confirms or rejects the booking, the user receives a notification.
    - The user has "My Bookings" page that shows the previous bookings and current booking with the status (accepted or rejected)
- Profile page: logged in users can see and update their profile data.
- Admin panel pages:
    - View users
    - View table bookings (can accept and reject a booking)
    - Add, delete, update Menu Item.
